ANALYTICA CHIMICA ACTA

An international journal devoted to all branches of analytical chemistry

(Full texts are incorporated in CJELSEVIER, a file in the Chemical Journals Online database available on STN International; Abstracted, indexed in: Aluminum Abstracts; Anal. Abstr.; Biol. Abstr.; BIOSIS; Chem. Abstr.; Curr. Contents Phys. Chem. Earth Sci.; Engineered Materials Abstracts; Excerpta Medica; Index Med.; Life Sci.; Mass Spectrom. Bull.; Material Business Alerts; Metals Abstracts; Sci. Citation Index)

VOL. 261 NO. 1–2 CONTENTS MAY 25, 1992

Papers presented at the fifth International Conference on Flow Analysis, Kumamoto, Japan, August 21–24, 1991

Foreword 1

Novel Aspects of Flow-Injection Analysis

The second coming of flow-injection analysis
J. Růžička (Seattle, WA, USA) 3

Exploiting stopped-flow injection methods for quantitative chemical assays
G.D. Christian and J. Růžička (Seattle, WA, USA) 11

Pyrolysis–flow-injection analysis–spectrophotometric determination of amino acids in aqueous solutions
J.L. Burguera, M. Burguera (Mérida, Venezuela), M. De la Guardia and A. Salvador (Valencia, Spain) 23

Detection by magnetic susceptibility for flow analysis procedures
J.F. Tyson, R.M. LaRue (Amherst, MA, USA) and S. Bogdanski (Cambridge, UK) 29

Flow analysis of UV-irradiated chemicals by chemiluminescence and electron spin resonance spectroscopy
S. Suzuki, H. Nakazawa, M. Fujita, S.-y. Ono, M. Suzuki, S. Takitani (Tokyo, Japan), M. Sonoda and Y. Sakagishi (Saitama, Japan) 39

Flow-injection amperometric system for enzyme immunoassay
D.M. Ivnitskii, R.A. Sitdikov and V.E. Kurochkin (Samarkand, Uzbekistan) 45

Flow-injection Fourier transform infrared spectrometric analysis
M. De la Guardia, S. Garrigues, M. Gallignani (Valencia, Spain), J.L. Burguera and M. Burguera (Mérida, Venezuela) . 53

Multi-site detection in flow analysis. Part 1. Relocation of spectrophotometric detector
E.A.G. Zagatto, H. Bergamin F°., S.M.B. Brienza, M.A.Z. Arruda (Piracicaba, Brazil), A.R.A. Nogueira (S. Carlos, Brazil) and J.L.F.C. Lima (Porto, Portugal) 59

High-sensitivity flow method for the determination of proteins with micro-flow plunger pumps
T. Korenaga, X. Zhou, M. Izawa, T. Takahashi, T. Moriwake and S. Shinoda (Okayama, Japan) 67

Atomic Spectrometry

Flow-injection atomic spectrometry: a new analytical technique
J.F. Tyson, S.R. Bysouth, E.A. Grzeszczyk and E. Debrah (Amherst, MA, USA) 75

Direct determination of copper in serum by flow-injection analysis
H. Wada, X.J. Zhou, T. Ishizuki, H. Yamada and G. Nakagawa (Nagoya, Japan) 87

On-line microwave sample pretreatment for the determination of mercury in water and urine by flow-injection cold-vapour atomic absorption spectrometry
B. Welz, D.L. Tsalev and M. Sperling (Überlingen, Germany) 91

Flow-injection atomic spectrometric determination of inorganic arsenic(III) and arsenic(V) species by use of an aluminium-column arsine generator and cold-trapping arsine collection
M. Burguera, J.L. Burguera, M.R. Brunetto (Mérida, Venezuela), M. De la Guardia and A. Salvador (Valencia, Spain) . 105

Improvement of detection limits for flow-injection flame atomic absorption spectrometry by dedicated signal processing
M. Sperling, P. Kościelniak and B. Welz (Überlingen, Germany) 115

(Continued overleaf)

Contents (continued)

Kinetic and Enzymatic Methods

Exploiting kinetic-based flow-injection methods for quantitative chemical assays
E.H. Hansen (Lyngby, Denmark) 125

Sequential determination of glucose, fructose and sucrose by flow-injection analysis with immobilized enzyme reactors and spectrophotometric detection
C. García De María and A. Townshend (Hull, UK) 137

Flow-injection analysis of micromolar concentrations of glucose and lactate in fermentation media
S. Benthin, J. Nielsen and J. Villadsen (Lyngby, Denmark) 145

Determination of L-glutamate by amperometric flow-injection analysis using immobilized glutamate oxidase: manifold for simultanecus detection of component signal and blank signal
K. Matsumoto, K. Sakoda and Y. Osajima (Fukuoka, Japan) 155

Amperometric flow-injection method for determination of biogenic diamines and hypoxanthine by combined use of immobilized enzyme reactors and a peroxidase electrode
T. Yao, M. Satomura and T. Wasa (Sakai, Japan) 161

Flow-injection analysis of trace elements by use of catalytic reactions
T. Kawashima (Tsukuba, Japan) and S. Nakano (Tottori, Japan) 167

Flow-injection determination of subnanogram amounts of manganese by catalysis of the oxidative coupling of *N,N*-dimethyl-*p*-phenylenediamine with *m*-phenylenediamine
S. Nakano, M. Nozawa, M. Yanagawa (Tottori, Japan) and T. Kawashima (Ibaraki, Japan) 183

Air-segmented continuous-flow analysis for vanadium based on a catalytic reaction with Bindschedler's green leuco base
M. Sugiyama and T. Hori (Kyoto, Japan) 189

Spectrophotometric Methods

Simultaneous spectrophotometric determination of iron and copper in serum with 2-(5-bromo-2-pyridylazo)-5-(*N*-propyl-*N*-sulphopropylamino)aniline by flow-injection analysis
S.W. Kang, T. Sakai, N. Ohno and K. Ida (Gifu, Japan) 197

Flow-injection spectrophotometric determination of trace cobalt with 2-(5-bromo-2-pyridylazo)-5-(*N*-propyl-*N*-sulphopropylamino)aniline: use of the rate-enhancing effect of copper(II) on the complex formation reaction of cobalt
T. Yamane and K. Koshino (Kofu, Japan) 205

Indirect spectrophotometric determination of complexing agents by flow-injection analysis based on redox reaction of copper(II) with iron(II)
H. Itabashi, K. Umetsu, N. Teshima, K. Satoh and T. Kawashima (Tsukuba, Japan) 213

Sandwich techniques in flow-injection analysis. Part 3. Simultaneous determination of Cr(VI) in two concentration ranges
J. Alonso-Chamarro, J. Bartrolí and R. Barber (Bellaterra, Spain) 219

Indirect spectrophotometric determination of potassium ion in water based on the precipitation with tetraphenylborate ion and a crown ether using flow injection
S. Motomizu, K. Yoshida and K. Tôei (Okayama, Japan) 225

Determination of free and combined residual chlorine by flow-injection spectrophotometry
K.K. Verma, A. Jain and A. Townshend (Hull, UK) 233

Flow-injection spectrophotometric determination of sulphate ion with a barium chloranilate–cellulose reaction column
K. Ueno, F. Sagara, K. Higashi, K. Yakata, I. Yoshida and D. Ishii (Kumamoto, Japan) 241

Flow-injection determination of cyanide by detecting an intermediate of the pyridine–barbituric acid chromogenic reaction
H. Ma and J. Liu (Beijing, China) 247

Spectrophotometric determination of phenolic compounds by flow-injection analysis
W. Frenzel, J. Oleksy-Frenzel (Berlin, Germany) and J. Möller (Höganäs, Sweden) 253

Flow-injection spectrophotometric determination of acetaminophen in drug formulations
K.K. Verma, A. Jain and K.K. Stewart (Blacksburg, VA, USA) 261

Spectrofluorimetric Methods

Flow-through sensing device based on derivative synchronous fluorescence measurements for the multi-determination of B_6 vitamers
D. Chen, M.D. Luque de Castro and M. Valcárcel (Córdoba, Spain) 269

Flow-injection fluorimetric determination of traces of calcium in brine
H. Wada, H. Atsumi and G. Nakagawa (Nagoya, Japan) 275
Spectrofluorimetric determination of cyanide and thiocyanate based on a modified König reaction in a flow-injection system
A. Tanaka, K. Deguchi and T. Deguchi (Kumamoto, Japan) 281

Environmental Analysis
Sensitive flow-injection technique for the determination of dissolved organic carbon in natural and waste waters
R.T. Edwards, I.D. McKelvie, P.C. Ferrett, B.T. Hart, J.B. Bapat (Caulfield East, Australia) and K. Koshy (Suva, Fiji) ... 287
Chemical oxygen demand determination in well and river waters by flow-injection analysis using a microwave oven during the oxidation step
M.L. Balconi, M. Borgarello, R. Ferraroli and F. Realini (Milan, Italy) 295
Determination of chemical oxygen demand in aqueous environmental samples by segmented flow-injection analysis
L.-C. Tian and S.-M. Wu (Nanjing, China) 301
Experience with flow-injection analysis in marine chemical research
L.K. Shpigun, I.Y. Kolotyrkina and Y.A. Zolotov (Moscow, Russia) 307
Determination of trace rhenium in sea water by inductively coupled plasma mass spectrometry with on-line preconcentration
M.B. Shabani and A. Masuda (Tokyo, Japan) 315
In-flow speciation of copper, zinc, lead and cadmium in fresh waters by differential-pulse anodic stripping voltammetry. Part I. Optimization of filtration and enrichment steps
W. Martinotti, G. Queirazza, F. Realini and G. Ciceri (Milan, Italy) 323
Continuous-flow method for the determination of total trihalomethane formation potential in waters
T. Aoki (Sakai, Japan) and K. Kawakami (Yokosuka, Japan) 335
Flow-injection determination of low levels of ammonium ions in natural waters employing preconcentration with a cation-exchange resin
M. Menezes Santos Filha (Aracajú, Brazil), B. Freire dos Reis, H. Bergamin F°. (Piracicaba, Brazil) and N. Baccan (Campinas, Brazil) 339
Fully automated system for the continuous monitoring of ammonium ion in fish farming plant sea water by flow-injection analysis
H. Muraki, K. Higuchi (Tokyo, Japan), M. Sasaki (Chiba, Japan), T. Korenaga and K. Tôei (Okayama, Japan) 345

Food Analysis
Flow-injection assay of enzyme inhibition in fish using immobilized diamine oxidase
J.M. Hungerford and A.A. Arefyev (Bothell, WA, USA) 351
Flow-injection determination of polyphenols using a plant juice carrier
S. Uchiyama and S. Suzuki (Saitama, Japan) 361
Direct automatic determination of bitterness in virgin olive oil by use of a flow-injection–sorbent extraction system
J.A. García-Mesa, M.D. Luque de Castro and M. Valcárcel (Córdoba, Spain) 367
Application of square-wave voltammetry for the determination of ascorbic acid in soft drinks and fruit juices using a flow-injection system
Y.-S. Fung and S.-Y. Mo (Hong Kong) 375

Electrochemical Techniques
Response time phenomena of coated open-tubular solid state silver halide selective electrodes and their influence on sample dispersion in flow-injection analysis
J.F. Van Staden (Pretoria, South Africa) 381
Simultaneous determination of nitrite and nitrate in water using flow-injection biamperometry
M. Trojanowicz, W. Matuszewski, B. Szostek (Warsaw, Poland) and J. Michałowski (Białystok, Poland) 391
Potentiometric flow analysis device using membrane-coated carbon rod ion-selective electrode detectors
E. Wang and S. Kamata (Kagoshima, Japan) 399
Sensitivity enhancement by potentiometric flow-injection analysis based on redox reaction with an iron(III)–iron(II) buffer
N. Ishibashi (Iizuka, Japan), T. Imato, S. Yamasaki and H. Ohura (Fukuoka, Japan) 405

(Continued overleaf)

Contents (continued)

Continuous-flow determination of phosphate using a lead ion-selective electrode
H. Hara and S. Kusu (Shiga, Japan) 411
Nitrate ion-selective electrode as reference electrode for flow-injection analysis
J. Alonso-Chamarro, J. Bartroli and C. Jimenez (Barcelona, Spain) 419

Separation Techniques
Coupling of continuous separation techniques with unsegmented flow systems. Review
M.D. Luque de Castro and M. Valcárcel (Córdoba, Spain) 425
Effect of sample viscosity on the behavior of thin-channel flow-through dialyzers in flow-injection analysis
L. Risinger and G. Johansson (Lund, Sweden) 435
Flow-injection analysis in the evaluation of supported liquid membranes
D.E. Barnes (Randburg, South Africa) and J.F. Van Staden (Pretoria, South Africa) 441
Simultaneous flow-injection analysis for two components with on-line dialysis and gas diffusion in series. Determination of chloride and ammonia nitrogen in industrial effluent water
J.F. Van Staden (Pretoria, South Africa) 453
Porous membrane permeation of halogens and its application to the determination of halide ions and residual chlorine by flow-injection analysis
S. Motomizu and T. Yoden (Okayama, Japan) 461
Flow-injection method for the determination of anionic surfactants after liquid–liquid extraction using on-tube visible absorption and fluorescence detection
S. Motomizu and M. Kobayashi (Okayama, Japan) 471
Time-based and volume-based sampling for flow-injection on-line sorbent extraction graphite furnace atomic absorption spectrometry
B. Welz, X. Yin and M. Sperling (Überlingen, Germany) 477

Titrations
Automatic titrations in unsegmented flow systems based on variable flow-rate patterns. Part 1. Principles and applications to acid–base titrations
J. Marcos, A. Ríos and M. Valcárcel (Córdoba, Spain) 489
Automatic titrations in unsegmented flow systems based on variable flow-rate patterns. Part 2. Complexometric and redox titrations
J. Marcos, A. Ríos and M. Valcárcel (Córdoba, Spain) 495
Development of a micro flow spectrophotometric titration method
F. Sagara, T. Kobayashi, T. Tajima, H. Ijyuin, I. Yoshida, D. Ishii and K. Ueno (Kumamoto-shi, Japan) 505

Theoretical Aspects
Real-time digital filters for signal processing in flow-injection analysis. Part 1. General considerations and simulation study
B. Szostek and M. Trojanowicz (Warsaw, Poland) 509
Real-time digital filters for signal processing in flow-injection analysis. Part 2. Practical applications
M. Trojanowicz and B. Szostek (Warsaw, Poland) 521
Experimental fluctuations of flow-injection signals
M.F. Giné, R.L. Tuon, F.J. Krug and M.A.Z. Arruda (Piracicaba, Brazil) 533
Aspects of sample dispersion for optimizing flow-injection analysis systems
T. Korenaga (Okayama, Japan) 539
Simple model of flow-injection sample transport for prediction of peak heights
S.R. Bysouth and J.F. Tyson (Amherst, MA, USA) 549

Survey
The first decade of flow-injection analysis in China. Review
Z. Fang, L. Sun and S. Xu (Shenyang, China) 557

Author Index 577
